# TCF LONG-TERM POOL

The TCF Long-Term Pool seeks long-term (10+ years) capital appreciation sufficient to preserve and enhance real, inflation-adjusted grantmaking power. Specifically, the return objective of this pool is CPI (inflation) + 5% (the Foundation's annual distribution rate). This pool is constructed to reduce public market volatility through diversification and enhance returns through private investments.

The Foundation maintains a disciplined process, regardless of market fluctuations, to ensure the long-term viability of its invested assets. This approach has proven prudent and sound over time.
